A Note from the Director:

In our efforts to help our state's historic places and people, we are often asked if they qualify for Federal grants. There are a few types of grants that are specific to a property. The National Park Service’s (NPS) State Preservation Office is tasked with prioritizing the types of grants that may be available for certain projects. We work closely with the Michigan Historic Preservation Network (MHPN) to ensure that our members have access to all available Federal funding sources.

Criteria for the Michigan Historic Preservation Network include all properties listed on the Michigan State Register of Historic Places or other Federal Register(s). The process varies depending on the type of listing, as well as the type of grant.

With Michigan’s thousands of historic properties, we know there are many that are not currently listed, and countless more that may meet the criteria for listing. The MHPN and our members are always looking for ways to engage the communities in which we work to help identify potential listings and support the preservation of their state’s historic places and people.
